

Tekla Structures configurations

Tekla Structures is one product available in different configurations that provide specialized sets of functionalities to suit the needs of the construction industry. Tekla Structures can be used to cover the entire building process from conceptual design to fabrication, erection and construction management.

Tekla also offers configurations of Tekla Structures for students for both home and classroom use. For more information, visit www.tekla.com/solutions/students.

The help covers the content of the Full configuration, so the configuration you are using may not contain all the described features.

Feature map

The features included in different configurations are:

Configuration Feature	Full	Steel Detailing	Precast Concrete Detailing	Rebar Detailing	Engineering	Construction Modeling	Primary	Project Viewer	Drafter
